TOURNAMENT OUTLINE

DATES

The 40K ETC 2018 will be held in Zagreb Arena, Croatia on August 3rd to August 5th.

Subscription fees are 49,45€pp and 21,45€pp for coach, team assistant or non playing captains. This does NOT include 3 warm meals as they cost an additional 16,5€pp.

Register via Tourneykeeper needs to be done by each team player by heading here:

<https://tourneykeeper.net/Shared/TKSignup.aspx?id=2471>

For Team Captains All registration info can be found by heading to:

<http://www.etc-tabletop.com/registration>

SCHEDULE

For the schedule head on over to:

<https://www.etc-tabletop.com/etc-2018-croatia/schedule/>

GENERAL TOURNAMENT OUTLINE

1. The ETC 40K is an 8 player Team Tournament.
2. 2000 pts Armies, 8th edition WH40K, Matched play rules
3. Armies have to be fully painted and based and be WYSIWYG (see basing document in case there is a question regarding, **or have your captain approve basing that might stray from the norm on the Captains council forum**). Models that are not official, do not fit the WYSIWYG profile, or considerably deviate from the norm **MUST** be presented at the 40K Captains Council (pics preferably), **at least a month** PRIOR to the tournament and meet an approval from a majority of Captains before they can be used at the tournament. Threads can be opened in the captains section on the Warhammer forums, and captains can assume that their players armies are OK'ed if no objections were raised and the thread was started within the deadline. If objections were raised assume the models/armies in questions cannot be used as you intend unless the chairmen intervene and state otherwise. Any models like this in use at the ETC without prior consent will be up for an immediate infraction notice (yellow card) for each game unless original stand-in models can be produced on the spot (for LOS purposes or otherwise).
4. Teams will be matched by swiss system after the first round. First round will be randomly drawn by means of the magic fingers of the Chairmen, or their proxies via Skype or in live fashion, and announced well ahead of the event so the first round can be prepared more intensely, as has been customary these last few years. Challenges can be sent to other teams for the first round, as long as the challenge is accepted by both captains. Challenges need to be announced in the captain's forums before the draw deadline. See the Planning later in this document for precise dates.
5. Battles last a maximum of 4 hours, in addition to the 30 minutes set aside for pairings (4.5 hour rounds).
6. Battles will take place on 72"x 48" tables with preset terrain. Advanced Battlefield Terrain rules are in effect.
7. Official language of the tournament is English.
8. **Publications released later than June 18th 2018 may not be used at the ETC for building army lists. FAQ's submitted by GW later than June 25th will not be in use at the ETC. We will try to have a final ETC FAQ out before that date as well, but will implement small errors or oversights that occur pas those dates.**
9. The matched play beta rules and guidelines for events are in use. Check [THIS LINK](#) for more info. The rule of 3 is applied to the datasheet name, even if the datasheets between different books would have different options/rules. For instance, for the rule of 3 an Adeptus Astartes Terminator unit would count the same as a Grey Knight Terminator unit. Daemon princes from different books would not count towards the rule of 3 as each daemon prince datasheet is named differently.
10. The update for Index: Renegade Knights can be used at the ETC. The update can be found via [THIS LINK](#).

SENDING IN A TEAM

TEAM FORMATION

If you are interested to bringing a new team to the ETC, you should make yourself known on the [ETC Forum](#) in the general 40K section. One of the admins will then get in touch with the details. In general though, if you want to go to the ETC with an existing team, you need to follow whatever protocol an existing team has put in place to make the team. Get in touch with your captain regarding that. It shouldn't be too hard to come by that info. The way ETC Captaincy works is that only the current Captain can announce his successor.

New teams will be given access to the dedicated sections so they can be part of the processes involved and can get directed help if so needed.

A 40K ETC Team consists of a minimum of 8 playing members. Of which at least 4 need to be able to show a record of nationality for representing a given country. For more info on what this entails, please refer to the ETC Charter. A 9th non-playing member may also attend the tournament to act as a coach or assistant for the team. The Team must have a nominated Captain (either playing or non-playing). A team may have additional roles or non-playing members, but they all need to adhere to the same restrictions and regulations that are put in place for non-playing team members.

Throughout the year, a Captain is the voice of his team and acts in their stead for all official communications and votes that are required. At the ETC, The Team Captain is ultimately responsible for the conduct of his/her Team and for pairing their Team each round, submitting results, and can be called in for a 40K Captains Council in certain situations. The Captains are also responsible for checking all the rows and tables for any discrepancies in terrain density and placement before the start of the tournament, and for organising their teams to check the final submitted rosters (at least 3 other countries) prior to the event.

A non-playing Team Member is allowed to:

1. Be the Team Captain
2. Do/assist the Pairings
3. Collate and submit Team Results
4. Ask questions about how the game is going (only in English, see below)
5. Tell their player how their team is doing and if they require a win/draw/loss from this game

A non-playing Team Member is not allowed to:

1. Give Tactical advice (they may not tell their player 'how' to get that win/draw/loss!) or interject in any way on in-game situations like forgetting that their player forgot to consolidate. If they perceive situations like that, especially in the case where players must do something but forget to, they can call for the game to be stopped, and then get a judge to rectify the situation.
2. Speak to their Team player in their native language. Speaking to their team members in the English Language is allowed as it is the tournaments official language (Not talking in English will be seen as interference with the game and is subject to a yellow card infringement type if reported).
3. Any of the 9 team members may perform a player replacement: play a game with any of the 8 armies submitted by the team in replacement of another team member for the duration of a whole round. Replacement during rounds (ie when games have already started) will not be allowed except under extraordinary circumstances validated by a joint decision by the head referees. A Captain must petition this change before the head referees. Any breach of these rules is to be brought to the immediate attention of a Referee.
4. Once players are at their tables at the start of any given round, it is not allowed within a team to share info on matchups or tactics by means of cellphones or other devices either. Any breach of this rule that gets noticed will see all offenders on the team admonished with an immediate yellow card.

ARMY COMPOSITION

What follows are the rules for composing an Army at the European Team Championships (ETC) 2018. There seem to be a lot of misconceptions so let's get down to basics first:

Army rules

When an Index calls out certain Armies and bestows a benefit for having an 'Army Of ...', like is the case for an Army of Thousand Sons or an Army of the Deathguard, or even an Ynnari army, it will affect all the models on the detachments level that meet the requirements and consist of models with the right keywords. For instance, in a roster that combines an Ynnari detachment alongside two other Aeldari detachments, the Ynnari detachment and all models in it will benefit from all the Ynnari special rules that apply to an 'Army of the Reborn'. Likewise, mixing Deathguard and Thousand Sons detachments will allow the models in each detachment to benefit from Deathguard or Thousand Sons as troops for instance, and all associated rules, as long as they meet all the other requirements listed to be a 'Thousand Sons Army' or a 'Deathguard Army'.

Faction rules

There are several factions out there that have an over-arching reach like the Imperium or Chaos faction but also the Ynnari faction. When such detachments are used, they use up all the other factions they are comprised of. For instance, a chaos army featuring a Thousand Sons, Deathguard and Chaos Space Marines would use up those three factions for the team. Please

note that for the Ynnari faction, there can be only one Ynnari build among the Aeldari factions on a team level, and as soon as an army takes any of the 3 models that have a datasheet mentioning the Ynnari keyword, or an army is declared to be a Ynnari army and gains the keyword, the Ynnari faction is used for the team.

When adding an Astra Militarum detachment to a Genestealer Cult army, do note that the faction will no longer be available to be taken up by the rest of team, even though the AM detachment faction does not count against the genestealer cult army and keyword restrictions.

Please note that some models have dataslates with keywords across factions like the Ministorum Priest, who has the Adeptus Ministorum and Astra Militarum keywords. Models like that can be used in each faction as listed on their datasheet. For instance, a ministorum priest taken in an astra militarum army does not take up the Adeptus Ministorum faction slot for the team and vice versa, and the datasheet can be used in both armies. For models with overarching keywords like Magnus, only take into account his actual faction keyword, in this case Thousand Sons. The Team can still have a faction Heretic Astartes Detachment elsewhere on the team. Index Factions like the Astra Telepathica with limited datasheets cannot be played as standalone factions but belong to their parent faction, in this case Astra Militarum.

GENERAL ARMY COMPOSITION ON THE TEAM LEVEL

1. Each Faction can only be used once per team.

- | | | | | |
|------------------------|------------------------|--------------------|--------------------|---------------------|
| - Space Marines | - Adeptus Mechanicus | - Orks | - Eldar Craftworld | - Heretic Astartes |
| - Blood Angels | - Astra Militarum | - Necron | - Drukhari | - Chaos Daemons |
| - Dark Angels | - Astra Telepathica | - T'au Empire | - Harlequins | - Questor Traitoris |
| - Space Wolves | - Adeptus Ministorum | - Tyranids | - Ynnari | - Deathguard |
| - Deathwatch | - Sisters of Silence | - Genestealer Cult | | - Thousand Sons |
| - Grey Knights | - Questor Imperialis | | | |
| - Legion of the Damned | - Inquisition | | | |
| - Adeptus Custodes | - Officio Assassinorum | | | |

As a reference, each book point cost section will list the factions that are available, and each book may feature armies with specific common keywords that can be taken as well.

Armies may include several detachments with different factions as long as they share a keyword. For any given single detachment, the common keyword cannot be Chaos, Imperium, Aeldari, Ynnari, or Tyranids, unless the Detachment in question is a Fortification Network. This implies Tyranid Detachments each must consist out of a different hivefleet. When mixed faction detachments like this are taken, remember that for army construction all constituent factions used will be used by the player and not available for any other players on the team. Remember that daemons cannot be used as a Faction in an army and then be summoned via another players reinforcement points, or taken in two different armies. Once one army has units of the daemon faction in a list, they are locked out of the team composition for the other players. Note that only one player on a team may summon daemons if the daemon faction has not been used in a list and more than one player has reinforcement points left that are eligible to

summon daemons with.

GENERAL ARMY COMPOSITION RULES ON THE PLAYER LEVEL

1. Each ETC army will consist out of a maximum of 3 detachments, following all the rules and restrictions for Battleforged armies as laid out in the Advanced Rules section. No Forgeworld rules or models are allowed at the event, except as stand-ins for models represented in any of the non-FW books released for 8th edition.

2. Detachments may freely be taken in a given army. This means you can have two or more supreme command detachments in one army andsoforth.

3. Understrength units can be used but only in an auxiliary detachment.

4. Once a codex has been released, all index options for a datasheet are void. We do not use the flowchart released by GW in their FAQ documents.

5. The Big FAQ from 16/04/2018 is in effect, and we will be implementing all of the beta rules at the ETC. For the 3 datasheet limit, this applies to same-named datasheets across books and factions. In case of units that can change their battlefield role, like Khorne berserkers, they can be taken 3 times in the elite slot regardless of how many times they are used as a troop slot in other detachments.

SCORING AT THE ETC

INDIVIDUAL LEVEL: VICTORY POINTS

Victory points scored by each player for his team are cumulative from three parts: objective scoring (EW and MOW), secondary objectives (STW, FB, LB) and a killpoint differential (up to 6). A tabling automatically gives a player 20 points.

Game Points

To determine Game Points, each player counts their victory points, subtracts their opponent's victory points and consults the table below.

<i>VP Differential in favor of player</i>	<i>Game Points Player Score</i>	<i>Game Points Opponents Score</i>
0	10	10
1-2	11	9
3-4	12	8
5-6	13	7
7-8	14	6
9-10	15	5
11-12	16	4
13-14	17	3
15-16	18	2
17-18	19	1
18+	20	0

Apart from the victory points specified in the missions, **when you achieve First Blood, Slay The Warlord or Linebreaker you get +1 victory points.**

Tactical Objective Cards

Each player starts with a full deck of maelstrom cards as described in the 8th edition rules. Once a card is completed at the end of a respective player turn, you announce it to your opponent and score that card. Each Tactical Objective number can only be scored once per game. **You may score 3 Tactical Objective Cards per turn.** If any objective is unattainable, immediately discard that card and redraw another. For a list of the Tactical objectives see the Scoring Document.

Killpoints

At the end of the game, players count up Killpoints scored and the player scoring the most KP's adds the differential to his score. For instance, player A scored 12 KP and player B 3, would mean player A adds 6 VP's to his tally for the game.

TEAM LEVEL: ROUND POINTS

A Round between teams consists of 8 individual games. Each game will score a number of points as described above. The combined total of all players scores will give a result for the Team as a whole.

A team result consist of the sum of its players game points.

Team result, match points

86-160 = Win, 2 Round points

75-85 = Draw, 1 Round point

0-74 = Loss, 0 Round points

If two or more teams have the same number of Round points (2/1/0) at the end of the tournament, game points gained from all battles will be used as tie-breaker.

NOTE: **penalties** incurred might change the above win conditions. In the cases where penalties on round points apply, a **difference of ten round points** always constitutes a win for the team with the ten points difference. If there are less than 10 battlepoints between the teams it automatically constitutes a draw on the team level.

ETC PAIRING SYSTEM

PAIRING BASICS

Captains have 30 minutes before each game to discuss with their team what the best strategy is for the round and to work out the pairings for the round. Rounds that start later than the allotted 30 minute mark should be reported **immediately** to the judges.

Captains roll off to determine which team will get to choose its table first. That team gains the “table choice” token.

Sequence of events – Step 1

Team A and team B secretly choose their defender and reveal them simultaneously.

After that, Team A and team B secretly choose their two attackers for the given defender and reveal them simultaneously.

Team A takes the two attackers given by team B, and secretly chooses which one is refused.

Team B does the same with the two attackers selected by team A. The refused Attackers are revealed simultaneously. and return to the pool of available armies.

At this point, two defenders know their attackers; this identifies two games. Log this on the score sheet. The Team with the “table choice” token lets his defender choose the table first followed by the defender who's team didnt have the table choice token. Two tables are now no longer available.

Sequence of events – Step 2

Repeat Step 1 with the difference that the Team without the “table choice” token now becomes the owner of this token throughout this pairing step.

Sequence of events – Step 3

Change “table choice” token again during this pairing step. This step will identify the remaining 4 games: 2 games “attacker vs. defender”, 1 game between refused attackers and 1 game with the remaining players.

Team A and team B secretly choose their defender and reveal them simultaneously.

After that, Team A and team B secretly choose their two attackers for the given defender and reveal them simultaneously. At this point there is only one last player available remaining in each team. These are automatically designated as being the last matchup. Each team immediately notes this on their round pairing log-sheet.

Team A takes the two attackers given by team B, and secretly chooses which one is refused.

Team B does the same with the two attackers selected by team A. The refused Attackers are revealed simultaneously. They will automatically be designated to play the 7th game of the round and face each other. Defenders know their attackers; this identifies two matches. Log this on the score sheet. Team with the “table choice” token let his defender choose the table and then teams alternate choosing tables, starting with the defending players first.

LIST SUBMISSION OUTLINES

PLANNING

Captains make sure their teams army lists are submitted on the Warhammer forums by 23:59 on July 2nd 2017.

After list submission deadline, each country will be assigned 3 other countries to check for errors. Teams have about one week to do this and two days to make necessary corrections (if any). Teams that meet those deadlines and submit correct army lists will receive 2 Team points (as for one team win) at the end of the tournament. The Head Referees will be in charge of overseeing this process. Glaring errors might result in a reduction in points, under the purview of the Referees. Making correct lists and submitting them in the correct format should be no difficult task for seasoned players. Army lists are first going to be posted on the captain's forum. After the submission deadline they will be published in the public section for all to see.

To summarize for 2018

Document deadline: [June 18th for codex releases](#), [June 25th for FAQ's from GW](#) (all FAQ's from GW released until June 25th are played and accepted at the ETC. Publications as of 26th on are disregarded, except for the ETC FAQ, for which we reserve the right to make small adjustments and correct oversights up until list submission date).

Player Subscription: before [July 17th](#) (all players need to be subscribed at [tourneykeeper.net](#) and signed in to the respective tournaments they will be attending)

Submission of Lists: [July 2nd](#) (lists in by 23:59 forum time at the latest)

Checking of Lists: July 2nd to July 9th (checking done 23:59 forum time at the latest)

Final Revisions: July 10th to July 17th

Round 1 Draw: [July 17th](#) (organized by the chairmen per usual, might have neutral supervisors if anyone wants to follow the process) and release of army lists on the public forums together with the Draw.

Round 1 Challenges: BEFORE July 17th. Any challenges between teams need to be announced and accepted by teams on the 40K captains forum before July 17th otherwise teams will be put into the drawing hat as per usual.

LIST SUBMISSION TEMPLATE

1. Each Army list MUST mention which model will be the [Warlord](#). If your Warlord is a character, assign a warlord trait to him, or indicate you will roll-off every battle. Add text as a **suffix behind the unit's point value as follows – WARLORD (Tenacious Survivor)**. **Warlord traits may be changed before the start of every game at the ETC but just need to be mentioned as a fallback in case changes are not communicated before the game, so no unfair advantages are gained. In such cases, use the warlord trait as mentioned on the armylist. Characters that have fixed warlord traits are of course exempt from choosing another warlord trait.**
2. Each Army list MUST mention which basic [psychic powers](#) have been assigned to the models or if they will be generated freely each round. The same goes for [artefacts or relics or equivalents](#) if they are chosen for models. Those that will be generated by CP prior to a battle need not be mentioned on the armylist. Such items can be changed before the start of each battle but just need to be mentioned as a fallback in case changes are not communicated before the game, so no unfair advantages are gained. In such cases, use the things listed on the armylist.
3. Each Team Roster must include all the [necessary info](#), meaning player names with the correct army, and clearly indicate what detachments are taken and how many command points each detachment provides to the player, and all other relevant information for your opponent. **From 2018 on, Powerlevels need to be added in per unit with each unit entry.** In the case of Space Marines for instance, it needs to be mentioned which Chapter you are playing, in the case of the Mechanicus, the Forgeworld, and so on... In the case of cross-faction detachments, each entry needs to be succeeded by their faction or chapter denomination. For instance - Troops: Plague Marines <Deathguardi>. The overall Army Faction of a roster is always defined by the common keyword of the army.
4. Team Rosters need to indicate if a [coach/assistant](#) spot is filled by the Team.
5. Every player entry needs to list the [country](#) to be able to quickly browse through list
6. Every player entry needs to list the [tourneykeeper profile NAME and NUMBER](#) used for the player when registering for the ETC on [tourneykeeper.net](#)
7. Detachments from a list are separated by double "==" and always mention how many Command Points the detachment brings to the army. A total CP number shall be listed on the armylist as well.
8. All upgrades and options must be shown on any given unit except those that come as standard on the model and cost zero points. Any wargear that is chosen (whether it costs points or free) must be listed.
9. List transports together with the unit entries they were bought for.
10. Upgrades to specific models in a complex unit are indicated per model
11. Players opting to keep summoning points in reserve need to indicate so clearly, and how many points are available, on their army roster

NOTE: It is perfectly fine to simplify the list outline below for detachments that are not complex. You can skip noting down all the [cratfworld/hivefleet/forgeworld](#) notations and such if there can be no confusion in your list. It would be perfectly fine to state the Detachment is Biel-

Tan in the Detachment header instead of repeating the craftworld notification for each unit for instance.

DISCIPLINE AT THE ETC

REFEREES

The Tournament will be officiated by 3 Head Referees. One from the host nation (normally) and two chosen by the ETC Chairmen from available candidates. They will be supported by any number of Line Referees, generally provided by the host country. As a general rule, a given Referee may never rule on a table where their own nation is competing unless both players at the table agree that it is OK to do so. A Referees word is usually final, but if a captain does not agree with a certain (important) decision he can petition a head ref for another opinion. Abuse of this right will not be tolerated. A red/yellow card system will be implemented to handle any disputes/issues (see penalty section below).

TEAMS FORFEITING

When an issue, or a complement of issues arises for a team to get to the point like they feel they want to concede a round at the ETC, take note of the following course of action.

Head referees will be warned and informed about the situation. If it is a gaming issue between two teams the head refs can try to defuse a situation and come to some sort of fair resolution for both parties. Head refs and captains of teams are the only involved parties here. There will be no onlookers or coaches or other teammates involved.

If there is a need for it, the head refs or one of the teams can ask for the 40K chairmen to intervene on an issue. This might result when the head refs feel like they are not comfortable taking a decision, or if one of the captains feels like the situation is still not treated fairly enough to proceed with playing the round, or if the head refs feel like the situation supercedes their authority or mandate

Chairmen take an informed decision after listening to the three parties: head refs and both captains.

Chairmen or either of both captains can then escalate to a prompt captains council for an immediate vote on the matter.

If the outcome of any of these is not acceptable to proceed with the round for either captain, that team forfeits the round, the losing team scores 0 points and the team left without opponents gets 90 points. The team that forfeits a round also forfeits their right to a vote the year after. There should be no gaming situation that warrants people coming from so far, paying so much money, and then not playing a round, and there should be some consequence to teams that force that kind of situation, for whatever reason.

PENALTIES AT THE ETC

PRE-EVENT PENALTIES

Teams need to submit lists in the correct format without errors or lose 'real' points. No exceptions, no come backs, no second chances.

After list submission deadline, each country will be assigned 3 other countries to check for errors. Teams have about one week to do this and two days to make necessary corrections (if any). Teams that meet those deadlines and submit correct army lists will receive 2 Team points (as for one team win) at the end of the tournament. The Head Referees will be in charge of overseeing this process. Glaring errors might result in a reduction in points, under the purview of the Referees. Making correct lists and submitting them in the correct format should be no difficult task for seasoned players. Army lists are first going to be posted on the captains forum. After the submission deadline they will be published in the public section for all to see.

Any [formatting errors](#) will NOT incur a penalty and this as long as they get corrected IN TIME before the list correction deadline has passed ([otherwise a -5BP penalty applies](#)). This penalty is not so much handed out as a result of not following the ETC format perfectly but more along the lines of not properly listing the itemization of models and units. i.e. not stating what options they have if there are multiple free or basic options (not listing what type of force weapon comes to mind for instance). Not stating the Warlord. Not correctly allocating dedicated transports to units. Those sort of things.

In the case of an [illegal list](#), - 10 battle points per player will be immediately handed out. Pretty self-explanatory. Lists that do not follow the ETC comp rules. There is no excuse for this, as teams and captains can freely ask if a given list would be OK well before the ETC starts. Changes made to an illegal list will always have to be as minimal as possible. For instance if there is a mistake in just 1 of three detachments, you can only change that detachment to make your list fully compliant. In the case an army gets invalidated because of this and an entire list needs to be changed, the referee corp might apply additional penalties because of unfair advantages gained after list submission. [This will be evaluated on a case by case basis and motivated before the ETC 40K captains in a debrief.](#)

Not fulfilling [list checking duties](#) will see a deduction of [-50 battlepoints per team not checked](#). Teams will need to reply to the thread with an OK from their team for the lists of teams they are required to check for compliance, even though another team might already have OK-ed the check with a post of themselves. No reply post automatically means a penalty. Going over the deadlines will also automatically incur a penalty. This will be applied very strictly. Please note that the penalty ONLY applies to 1st round checks. This is also overly harsh but listchecking is serious business, and as such every team should make the effort to comply. So as an overview: every team that needs to check the lists of a given country needs to reply to the thread on the

forums with either an OK or with their findings to correct. It is stimulated to help each other conform to the norm. For instance someone with some free time could reformat a list that is not fully compliant and post it in the thread to save the referees and the other teams some time, but it is also Ok to just post that the formatting is not compliant.

Any checks required as a result of incorrect or illegal lists, will be done by the referee corps to make sure it is done quickly and the corrected list are final and compliant.

Any teams who have not signed up their full complement of players at tourneykeeper.net will incur a pre-event win penalty. Effectively, 2 points will be deducted from their overall score at the end of the tournament. This is harsh, but so is making it a pain for the organization. Any questions or comments regarding [tourneykeeper](http://tourneykeeper.net), contact a chairmen or launch a topic regarding. Player profiles need to be INSTANTLY RECOGNISABLE for the referees. Opening a profile with the name Awesomedude 1 for instance is not OK. If for some reason players want to keep their anonymity, it is fine to refer to yourself as N. Kerr or Neil K. or Scottish Player 1 as long as it is easily and instantly traceable from the armylist for instance for those organizing the event. In every situation where this is not the case, teams will LOOSE these two GAME points.

EVENT PENALTIES

All in-event penalties are **team cumulative**, and will strictly be imposed on the **round points**. As an example, Team A and B have a result of 75-85 in the round, but Team A incurred two penalties that round and effectively sit at 65 points. This loses them the round. The penalties below are applied incrementally. This means if player A on a team gets penalized, then subsequently player B on same team gets penalized, the penalty against their Team escalates as the Team has then effectively committed 2 offenses. This can cause that team to lose a match, it cannot cause the other team to win the match (ie, you still need to reach 76 points as the opposing team to draw, and 86 to win). This can result in a match result of a draw/loss or loss/loss in extreme scenarios.

- 1st infraction - official team warning
- 2nd infraction – 5 Round points per team
- 3rd infraction – 10 Round points per team
- 4th infraction – 15 Round points per team
-

In addition, if an **individual player** is responsible for **3 infractions** during the event, they are **expelled immediately** from the ETC event as soon as the 3rd infraction is confirmed by the referee crew. Any remaining games immediately are allotted a 0-20 score. Additionally, the player in question will be imposed with a one year cool-off period and will be expelled from attending the next ETC automatically. After that his infraction log will be reset.

The referee crew has the right to escalate any infraction to an immediate expulsion or even life-

Page 19

time ban from the ETC depending on the gravity of the infraction and the situation that presented itself. The ETC referee crew will motivate this decision in their post-event debrief before the ETC40K Captains.

Note that a record of all infractions will be kept and published after the event. All infractions and warnings will be taken into consideration for 3 successive years. We want to flag repeat offenders and take preventive measures to exclude such individuals from attending and ruining the experience. After each ETC the captain's council will be able to review the data and see if there's a pattern, whether a lot of warnings were received playing against certain teams or certain players. The idea is then for the community to decide if certain penalties that were received will be adjourned for the following year or not.

A list of offenses follows below. Take note that the referee corps main concern should always be that games are completed and played. This of course depends on the transgression but normally the focus should always lie on games to be played even if certain penalties will apply. Everyone paid good money to be at the ETC and to play some games so that should be enforced. For example, someone might have modeled his entire army in a thematic way but his opponent and the referees agree it falls into the realm of modeling for advantage and the player in question does not have enough stand-ins available. Referees will force the game to be played and at the end of the round apply any penalties that are in place for such transgressions. This way we are sure everyone gets their full complement of games in under normal circumstances.

LIST OF OFFENCES AT THE ETC

Time Issues:

Slowplay is a serious issue, and all games at the ETC should at least **finish turn 5** within the allocated timeframe, though games preferably go the mile with a natural roll for turn 6 and 7. Any reports of games not finishing on turn 5 will see a **MANDATORY** use of a chess clock for the rest of the tournament for the players involved. If either player does not manage to finish any of their games within the allotted timeframe, ALL of their games at the ETC, retro-actively, will be scored 0-20. This is harsh, but so is stealing away points from other teams by not finishing games or having them run their course. We expect teams that take armies that take a while to play to train their teammates to use it within the allotted timeframe, or leave said armies at home. We encourage players to call upon a referee for every instance where players think time might be or become an issue, and this at any stage of the game, whether when discussing lists, during deployment, or during any of the battle rounds.

It is not mandatory to fill in and use the timesheets for each game. When issues with time constraints and slowplaying are reported, both players involved will be requested to use a **chessclock in the game where the slowplay was reported, as well as** all ensuing games. Players that refuse or do not properly measure and record the

time they use during a battle from that point on, will be automatically **expelled from the tournament** and all their games will be reported as a 0-20 loss. This may impact previous rounds and team scores. It is both players duty to keep an eye on time allocation for both players. If problems in a game are suspected, the referee crew can be notified prior to or during a game, and a time allocation sheet can be used to keep track of how long each players turns are to indicate where the problem lies. Alternatively, at any time, one or both players may petition the referee crew to foresee a chess clock for a particular game. The allocated time for games where a chess clock is in use will be divided equally over both players. Once a player hits their allotted time on the clock they can take no further actions during the game except in order to:

Make pile in moves

Make saving throws, and taking a leadership test if required to

Score objectives that they have already achieved or already hold

Chessclock Time Management:

General rules are that time can be passed any time when it is the opponent's action/decision making, and is always paused in the event of a rules discussion. **We don't encourage a switching between players time for each action that occurs during a game like for every armor save that needs to be taken, as time spent this way is mostly trivial over the course of the game, though players may always opt to inform their opponents they are passing along the time and then pass on the time used on the clock if they feel their opponents are taking too long.**

When does time start?

Time starts when the first pregame action or dice roll happens.

Rules:

1. Each player is responsible for their own time. It is a player's obligation to make sure that their time is being handled properly. If this is not the case, see the penalty outlined above. Being expelled from the tournament is a likely eventuality in case of bad time management when chess clocks are appointed.

2. Any major rule dispute results in a paused time scenario. The time is to remain paused until a formal judge is called to the table and resolves the dispute. Time allocated this way will be distributed equally amongst both players and deducted from their overall remaining time.

3. If a player's time runs out (2h minus half of stop-the-clock time), they may not perform any more actions. The only exception is if they are in the middle of moving a unit, they may finish so that the unit is placed legally on the board. As an example, this can include moving a unit in the movement phase, finishing moving a unit into assault (note they will not be able to attack), or consolidating a unit. Any other action is immediately stopped.

4. If a player runs out of time they may only perform the following actions:

- a. Pile in moves.
- b. Making saving throws, and taking a leadership test if required to.
- c. Scoring objectives that they have already achieved or already hold.

The most important rule is rule number 1. This is the most important rule because it puts time in your control, and fairly allocates time while players interact. It is each player's right to pass the time to his opponent whenever their opponent is making an action or spending time making a decision.

Some examples of this are as follows:

1. You put 20 wounds on a unit containing multiple special weapons and models with different saving throws. Pass the clock to your opponent so he can make decisions regarding where to start saving and make the necessary rolls.
2. Your opponent must make 3 leadership tests after the shooting phase is over. Pass the clock to your opponent while he makes these tests and removes models from the units that failed.
3. You destroy a vehicle and your opponent has a large squad inside that he wants positioned just right. Pass the clock to him while he disembarks his models.

These examples are limited but show the basic concept. You manage your own time and it is up to you to pass the clock. If you burn your own time, it is not your opponent's fault.

When does the game end?

Games end naturally depending on random game length rolls or at the start of a new turn when neither player has greater than 5:00 minutes of time left on the clock. Stop the game and count points instead of starting another round. **If the game has not concluded by the natural roll of a dice to see if round 6 occurs when this happens, players will be subject to a warning.**

Excessive rules questions:

If a player is found to be repeatedly calling referees over for rules questions which are clearly answered in any of the relevant game literature including the ETC FAQ, they will receive an infraction penalty (this is a form of time wasting). The number of rules calls required to gain such a penalty is determined at the discretion of the 3 head referees on a case by case basis - this prevents people being penalized for language issues resulting in such questions, and also for stops player 'playing the system' and stopping before the threshold for a penalty is attained.

Dice-, movement- or rules-cheating:

Any instances of the following, or anything deemed as cheating within similar confines, witnessed by a referee and/or an impartial bystander (i.e. a person not associated in any way with either player or team) dice cheating (loaded dice, incorrectly counting the number of passed or failed rolls, changing the value of dice rolled, etc) , movement cheating (moving too far, pushing

models outside of their regular movement allowance, etc), rules cheating (forgetting core rules for your OWN army and models, etc), will all result in an instant infraction. It is to be considered common practice to let your opponent roll ANY dice you also use during the game **without the need for consent**. Players that have issues with this can opt to use any other set of dice they feel comfortable their opponent also uses.

Poor sportsmanship or negative/aggressive attitude:

Any player or team member seen to be acting in any manner not in-line with the expectations of friendly but competitive gaming at the ETC, as to be deemed by any referee in conference with at least 2 head referees, will be immediately penalized with an infraction notice. This penalty is in place to ensure the referee crew has the necessary clout to enforce the spirit of the game. We want to stress, as a community, that this is a gentleman's' game played in a friendly but competitive manner. A few examples to make it clear:

- A player forgets to immediately roll for reserves or drawing tactical objectives, and his opponent objects to this when the player remembers later in the turn during any given phase. A judge will immediately sanction players objecting to this taking place, and hand out a warning for unsportsmanlike conduct. Team in question will suffer an infraction penalty if a warning or penalty was already issued to said player. It is both players responsibility to ensure mandatory things that happen in the game take place.
- A player forgets to announce he will use a certain Doctrine or wargear, or skyfire, at the start of the turn or phase and remembers later in the turn or phase. It is OK as an opponent to disallow the use of said rule or item, but let it be known that we strongly discourage such behavior and as such any player clinging to this course of action in terms of getting a better in-game advantage will still be issued an official warning for unsportsmanlike conduct. All of this will be viewed by the judges within the confines of the turn or phase. As an example it would not warrant a penalty if a player used up all his dice in the psychic phase while forgetting to cast Invisibility or the like.

Illegal Alternative Models:

If a player uses alternative models that have not gained prior approval at the captains council,, then at the discretion of the referees those models will be removed from the board if an unfair in game advantage is felt to have been gained. The player will have the opportunity to replace them with the official GW models. If no models are immediately available he will continue the event without the use of said models whatsoever. If a player subsequently is caught reusing said 'banned' models he will incur an infraction notice.

Illegal communication between team members

Any communication between team members and/or spectators should always be in English wherever possible and have no relation to strategic or tactical advice regarding any games in progress. Failure to do so will results in an infraction when reported. Obviously in some cases communication may not be possible in English, in such a case players should seek the assistance, where possible, of a referee who understands their language so as to adjudicate. If such a referee is not available then it is up to the discretion of the head refs if it is felt illegal tactical or strategic advice has been given or not. Players can of course seek the approval of their op-

ponents to confer with a countryman in their native tongue prior to starting a conversation.

Slow Play

A minimum of 5 mandatory turns is required to be completed every game. Teams taking armies or players that take a lot of time should train hard to be able to finish games to turn five within the allotted time frame or not take said armies to the ETC. Again it is the responsibility of the players, not the referees, to make sure games complete at least 5 turns, and that a roll-off for turn 6 happens with time left to play said eventual turn. So once more Teams need to factor this into both their list design and their play-testing or suffer the consequences. If it looks like a game will not reach the end of turn 5, even early on in the game, then it should be brought **immediately** to the attention of the refs - who will decide based upon the following, but not exclusive, criteria, if any penalties are required:

Number of ref calls by a player (see previous for policing). The referees will have a list of teams and players to keep track of this over the course of the tournament. Refs will align these numbers every round. Calling a ref and waiting or looking for a ref have been common to slow down progression in games over the years so this is a factor to take into consideration. Players calling refs to their tables a lot will be judged with the possibility of foul play and stalling in mind.

Number of models in an army, including summoned units. This can have an effect, especially if 2 big armies are facing each other. As such it is down to the referees to decide if it was unintentional or not.

Time taken to deploy should have been logged on the timesheet. Unlike turns which involve the interaction of both players, the deployment does not. Excessive deployment time can therefore be an indicator of slow play. Then obviously it is down to the discretion of the ref if a player is slow playing on purpose.

It is **both players** responsibility to ensure games finish in time. Any game that gets reported where players do not play all turns, including random game length, will see both players receive an official warning. If your opponent is too slow, tell him/her to speed up, if it doesn't help, get a judge to help speed things up. If that doesn't happen the above will be strictly applied. Consecutive games where there is the suspicion of slow play will see players that were previously warned incur an automatic infraction penalty. Thereafter any instance of slow play as deemed by the referees instantly incurs further penalties, cumulatively within even a single round if required.

ETC MISSIONS

GENERAL MISSION CLARIFICATIONS

For the purpose of objectives, players need to provide objective markers from either 1, 2 or 3 inch diameter. This to make measuring distances easy during the game. Always measure distances to the board edges and other markers from the center of the marker. Disregard any referral to players picking the deployment map in the missions played, as the ETC uses fixed deployment types.

Objective placing: Players roll off. Whoever rolls highest starts placing 1 of 6 objective markers, alternating between players until all have been set up. Note that when placing objectives, they are always dropped in order. Place objective 1 first, followed by objective 2, ...

Choosing deployment zones: Players roll off. Player with highest score chooses deployment zones after which player with lowest score starts deploying his first unit in his deployment zone, alternating until both sides have set up their army.

First Turn: The player who finishes setting up first gets a +1 to the roll-off to decide to go first or second.

Random Game Length: The player who had first turn rolls a dice after T5. Game continues on the roll of 3+. At the end of T6, the player who went second rolls a dice. Game continues on the roll of 4+.

Scoring: Count up points scored from maelstrom, eternal war, **killpoints**, and secondary objectives (Slay The Warlord, First Blood and Linebreaker). The difference in total VP's scored between the two players decides the outcome of the battle.

MODIFIED PRE-GAME INTERACTIONS

Follow this procedure to start your games at the ETC:

1. Roll off for who places first objective
2. The player winning the roll off now selects his warlord trait. His opponent then does the same
3. The player having won the roll off chooses his psychic powers. His opponent then does the same
4. **The player having won the roll off chooses if he will spend CP's for stratagems to purchase extra relics for any of his characters. His opponent then does the same.**
5. Start placing objectives
6. Roll off for who chooses sides
7. Whoever did not choose side starts to deploy his first unit
8. Alternate deploying until done
9. Roll off for who starts, applying a +1 for whomever finished deploying first. **In the case of re-rolling ties, the +1 still applies to any re-rolls that might occur.**
10. Roll to seize the initiative
11. Pre-game deployment
12. **Players announce their remaining available command points and clearly mark this somewhere for their opponent to keep track of during the game**
13. Start the first battle round

MISSION 1

Objective #1: **Eternal War: Frontline Warfare (Marker 1-4)**

Objective #2: **Maelstrom of War: Contact Lost**

Deployment: **Spearhead Assault**

Objective placing (players freely decide where they want to place the markers with the caveat that only marker 1-4 count for EW scoring) **and Choosing deployment zones happens first.**

First Turn: The player who finishes setting up first receives a +1 to a roll-off to see who goes first. If they take the first turn, opponent can roll a D6; on a 6, they manage to seize the initiative, and get the first turn instead!

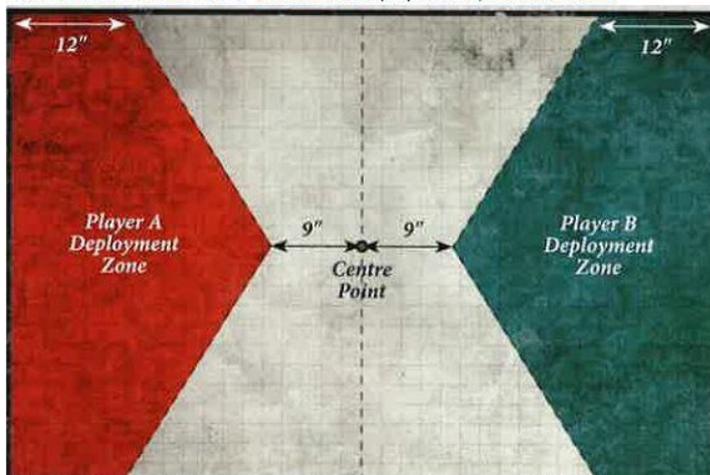

Tactical Objectives: Generate 1 Tactical Objective first turn and then 1 additional objective for each marker under your control starting from the second turn, up to a maximum of 6 cards.

Mission Special Rule: Temporary Comms Uplink Stratagem At the start of any of their turns, a player with less than 6 active tactical objectives can spend 3 Command Points to generate an extra card that turn.

Random Game Length: The player who had first turn rolls a dice after T5. Game continues on the roll of 3+. At the end of T6, the player who went second rolls a dice. Game continues on the roll of 4+. This is a mission roll and cannot be re-rolled with a command point reroll.

Scoring: At the end of the game Eternal War points are scored for Markers 1 to 4. Markers completely in your own deployment zone are worth 1 VP, while Markers completely in the enemy's deployment zone are worth 4 VP and other Markers are each worth 2 victory points. **Markers are assumed to be completely within a deployment zone if the very center of the marker is located within a deployment zone.** At the end of the battle, count up points scored from Eternal War, Maelstrom, **Killpoints** and secondary objectives (Slay The Warlord, First Blood and Linebreaker). The difference in total VP's scored decides the outcome of the battle.

EW: Frontline Warfare MOW: Contact Lost Deployment: Spearhead Assault

Tactical Objectives:

Generate 1 Tactical Objective first turn and then 1 additional obj. card for each marker under your control, up to a maximum of 6 cards.

EW Scoring:

At the end of the game points are scored for Markers 1-4. Markers you control that were originally **COMPLETELY** within the opponents deployment zone are worth 4VP. Markers you control completely within your own deployment zone are worth 1VP. All other markers are worth 2VP.

Mission Special Rule: For this mission, **Temporary Comms Uplink** is in effect. If, at the start of their turn, a player has less than 6 active objective cards, for 3CP an additional card can be generated this turn.

MISSION 2

Objective #1: **Eternal War: ETC Resupply Drop (ALTERED, 2 remaining Markers)**

Objective #2: **Maelstrom of War: Deadlock (3 cards per turn scoring cap)**

Deployment: **Vanguard Strike**

Objective placing and Choosing deployment zones happens first.

First Turn: The player who finishes setting up first receives a +1 to a roll-off to see who goes first. If they take the first turn, opponent can roll a D6; on a 6, they manage to seize the initiative, and get the first turn instead!

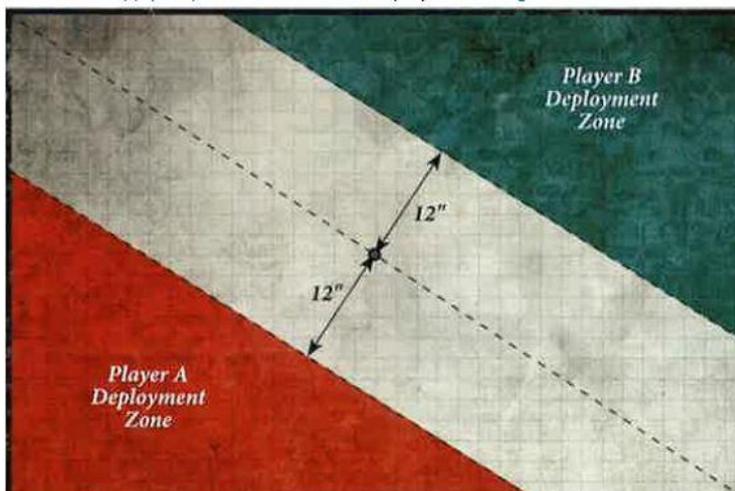

Tactical Objectives: Generate up to 6 Tactical Objectives on the first turn, 5 on turn 2, etc...

Mission Special Rule: Strategic Deadlock: When using command points, double the cost from turn 3 onwards. At the start of battleround 3, before drawing new tactical objectives, player whose turn it is selects three markers on the battlefield and determines randomly which one will run out of supplies. That marker scores no points for EW at the end of the game. His opponent does the same for the 3 markers that weren't chosen initially. At the start of battleround 5, the process is repeated and another 2 objectives run out of supplies and generate no points for Eternal War at the end of the game. Each remaining EW objective is worth 4VP when controlled at the end of the game

Random Game Length: The player who had first turn rolls a dice after T5. Game continues on the roll of 3+. At the end of T6, the player who went second rolls a dice. Game continues on the roll of 4+. This is a mission roll and cannot be re-rolled with a command point reroll.

Scoring: At the end of the game, 4VP's are scored for Eternal War for each of the 2 remaining EW markers under your control. Count up points scored from Eternal War, Maelstrom, **Killpoints** and secondary objectives objectives (Slay The Warlord, First Blood and Linebreaker). The difference in total VP's scored decides the outcome of the battle.

EW: ETC Resupply Drop MOW: Deadlock Deployment: Vanguard Strike

Tactical Objectives:

Generate up to 6 Tactical Objectives on the first turn, 5 on turn 2, etc...

EW Scoring:

At the start of battleround 3, before drawing new tactical objectives, player whose turn it is selects three markers on the battlefield and determines randomly which one will run out of supplies. That marker scores no points for EW at the end of the game. His opponent does the same for the 3 markers that weren't chosen initially. There are now only 4 markers remaining in play. At the start of battleround 5, the process is repeated and another 2 objectives are taken off the battlefield. Each remaining objective is worth 4VP when controlled at the end of the game.

Mission Special Rule: Strategic Deadlock. When using command points, double the cost from turn 3 onwards.

MISSION 3

Objective #1: **Eternal War: Scorched Earth (Marker 1-6)**

Objective #2: **Maelstrom of War: Tactical Escalation (3 cards per turn scoring cap)**

Deployment: **Dawn of War**

Objective placing and Choosing deployment zones happens first.

First Turn: The player who finishes setting up first receives a +1 to a roll-off to see who goes first. If they take the first turn, opponent can roll a D6; on a 6, they manage to seize the initiative, and get the first turn instead!

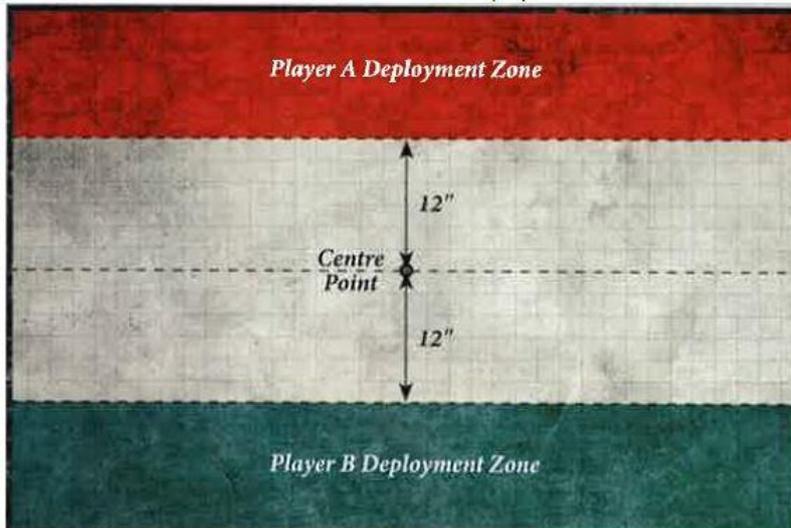

Tactical Objectives: Generate Tactical Objectives up to the current battle round each turn.

Mission Special Rule: Both players announce their **Tactical Priority Objective Type** (Capture and Control, Storm and Defend, Purge, Seize Ground, Annihilation, Take & Hold) that will score an extra VP or diminish points when discarded, starting with the player that goes first. If you discard a card that is unachievable, no points are lost.

Random Game Length: The player who had first turn rolls a dice after T5. Game continues on the roll of 3+. At the end of T6, the player who went second rolls a dice. Game continues on the roll of 4+. This is a mission roll and cannot be re-rolled with a command point reroll.

Scoring: Each player scores 1 VP at the end of each of their turns for each objective marker they control. However, if an objective marker is within the enemy's deployment zone you can choose to raze it if you control it; doing so scores you 2 victory points instead of 1 but that objective marker is then no longer scoring points for Eternal War. The difference in total VP's scored during the game decides the outcome of the battle. Count up points scored from Eternal War, Maelstrom, **Killpoints** and secondary objectives (Slay The Warlord, First Blood and Linebreaker). The difference in total VP's scored decides the outcome of the battle.

EW: Scorched Earth MOW: Tactical Escalation Deployment: Dawn Of War

Tactical Objectives:

Generate Tactical Objectives up to the current battle round each turn.

EW Scoring:

At the end of each battleround, each player scores 1 VP's for each of the markers he currently controls. Markers in the opponent's deployment zone can be razed when controlled for 2Vp's after which the marker is no longer used for EW scoring.

Mission Special Rule:

Both players announce their **Tactical Priority Objective Type** (Capture and Control, Storm and Defend, Purge, Seize Ground, Annihilation) that will score an extra VP or diminish points when discarded, starting with the player that goes first. If you discard a card that is unachievable, no points are lost.

MISSION 4

Objective #1: **Eternal War: ETC Secure and Control (ALTERED, Marker 1-6)**

Objective #2: **Maelstrom of War: Cleanse And Capture (3 cards per turn scoring cap)**

Deployment: **Search And Destroy**

Objective placing (Players secretly note the point values of the markers being 4, 3 or 2 VP as they put them down) and **Choosing deployment zones happens first.**

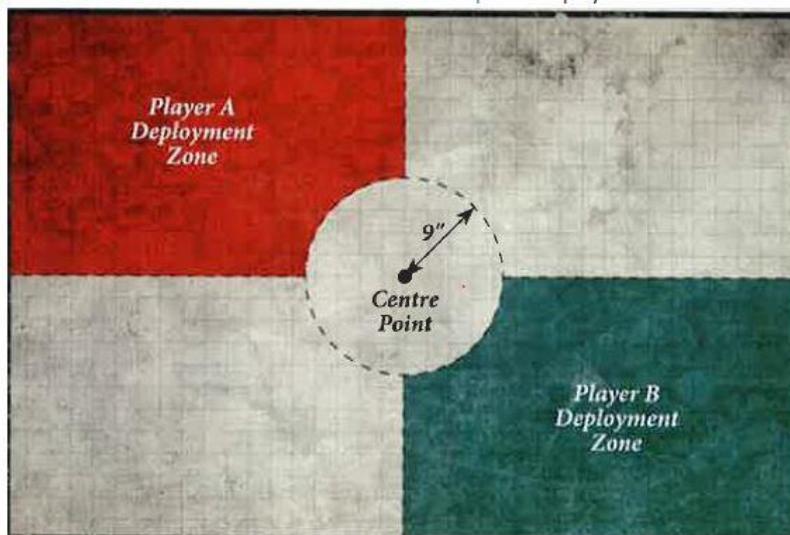

First Turn: The player who finishes setting up first receives a +1 to a roll-off to see who goes first. If they take the first turn, opponent can roll a D6; on a 6, they manage to seize the initiative, and get the first turn instead! The value of the markers are revealed right after the seize the initiative roll-off.

Tactical Objectives: Generate up to 3 Tactical Objectives each turn.

Random Game Length: The player who had first turn rolls a dice after T5. Game continues on the roll of 3+. At the end of T6, the player who went second rolls a dice. Game continues on the roll of 4+. This is a mission roll and cannot be re-rolled with a command point reroll.

Scoring: At the end of the game each marker is worth 4, 3 or 2 VP respectively to the player controlling it. The difference in total VP's scored during the game decides the outcome of the battle. Count up points scored from Eternal War, Maelstrom, **Killpoints** and secondary objectives objectives (Slay The Warlord, First Blood and Linebreaker). The difference in total VP's scored decides the outcome of the battle.

EW: **ETC Secure and Control** MOW: **Cleanse and Capture** Deployment: **Search and Destroy**

Objective Placement:

Players secretly note the point values of the markers being 4, 3 or 2 VP as they put them down

Tactical Objectives:

Generate 3 Tactical Objectives each turn.

EW Scoring:

At the end of the game each marker is worth 4, 3 or 2 VP respectively to the player controlling it.

MISSION 5

Objective #1: **Eternal War: ETC Relic (ALTERED) & Scouring (Marker 1-6)**

Objective #2: **Maelstrom of War: Spoils of War (3 cards per turn scoring cap)**

Deployment: **Hammer and Anvil**

Objective placing (The relic is placed in the exact middle of the table) and **Choosing deployment zones** happens first.

First Turn: The player who finishes setting up first receives a +1 to a roll-off to see who goes first. If they take the first turn, opponent can roll a D6; on a 6, they manage to seize the initiative, and get the first turn instead! Mark the superior (4VP) and inferior marker (1VP) before starting the first battleround.

Tactical Objectives: Generate up to 3 Tactical Objectives each turn. **Domination** is only achieved when all markers, including the relic, are controlled by one player.

Mission Special Rule: Precious Cargo Tactical Objective X type cards can be scored by either player, regardless of which player generated the card. In addition, these cards cannot be discarded unless achieved. **Steal The Loot** the player that scored more Tactical Objective X cards than their opponents scores an additional VP.

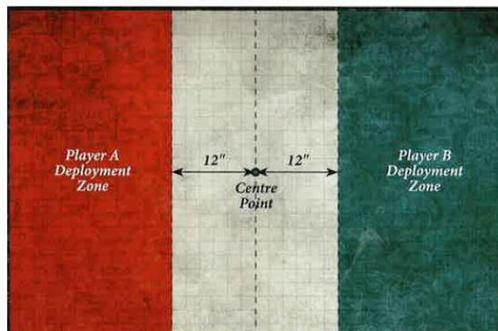

Random Game Length: The player who had first turn rolls a dice after T5. Game continues on the roll of 3+. At the end of T6, the player who went second rolls a dice. Game continues on the roll of 4+. This is a mission roll and cannot be re-rolled with a command point reroll.

Scoring: At the end of the game the Relic is worth 5VP to the player whose model is carrying it, or 2VP to the player who is controlling it. The Superior Marker is worth 4VP to the player controlling it, while the Inferior Marker is only worth 1 VP. Score 2 VP for each other marker. Count up points scored from maelstrom and secondary objectives as well as from **Steal The Loot**. The difference in total VP's scored during the game decides the outcome of the battle. Count up points scored from Eternal War, Maelstrom, **Kill-points** and secondary objectives objectives (Slay The Warlord, First Blood and Linebreaker). The difference in total VP's scored decides the outcome of the battle.

NOTE: When the relic is dropped put it in base contact with the model that was carrying it prior to removing it from the table. Player owning the carrying model decides where the relic is dropped.

EW: ETC Relic & Scouring MOW: Spoils Of War Deployment: Hammer and Anvil

NOTE: When the relic is dropped put it in base contact with the model that was carrying it prior to removing it from the table. Player owning the carrying model decides where the relic is dropped.

Tactical Objectives & Relic Placement:
Generate 3 Tactical Objectives each turn. Domination is achieved when all markers, including the relic, are controlled. The relic is automatically placed in the exact middle of the table.

EW Scoring:
Determine the superior (4VP) and inferior marker (1VP) prior to the start of turn 1. Superior objective is worth 4VP, inferior marker 1VP and all other objective markers are worth 2 VP if controlled at the end of the game. At the end of the game the Relic is worth 5VP to the player whose model is carrying it, or 2VP to the player who is controlling it.

Mission Special Rule: For this mission, Precious Cargo and Steal The Loot are in effect. Secure Objective 'X' cards can be achieved by either player regardless of who generated the card, and these objectives can only be discarded when achieved. If one player scored more Secure Objective 'X' cards than his opponent, score one additional VP.

MISSION 6

Objective #1: **Eternal War: ETC Dominate and Destroy (ALTERED)**

Objective #2: **Maelstrom of War: Targets Of Opportunity (no cap on Maelstrom cards scored)**

Deployment: **Frontline Assault**

Objective placing and Choosing deployment zones happens first.

First Turn: The player who finishes setting up first receives a +1 to a roll-off to see who goes first. If they take the first turn, opponent can roll a D6; on a 6, they manage to seize the initiative, and get the first turn instead!

Tactical Objectives: Generate 3 Tactical Objectives at the start of the first turn. In each subsequent turn, **Opportunity Lost** takes effect. Discard all active objectives before drawing 3 new ones. If a player runs out of cards during the game, he reshuffles all the cards he hasn't scored yet this battle and proceeds to draw the necessary cards.

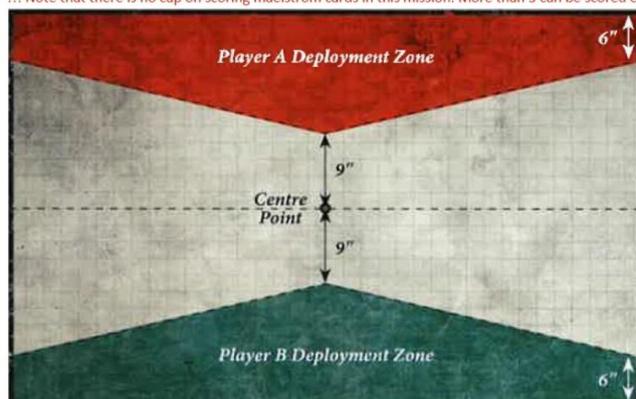

Mission Special Rule: Opportunity Lost At the start of each round, players have to discard all active objectives and draw 3 new ones. **Second Chance** At the start of your turn, before discarding all objectives, spend 2CP to keep one objective card active and draw 3 new cards (plus ones scored for Dominate and Destroy). **Dominate and Destroy** Instead of using No Quarter Given as laid out in Chapter Approved, draw an additional maelstrom card each round for each KP scored in your previous turn and your opponents previous turn, up to a maximum of 6 cards. There is no cap on the amount of maelstrom cards that can be achieved per turn. All cards can be scored freely every turn.

Random Game Length: The player who had first turn rolls a dice after T5. Game continues on the roll of 3+. At the end of T6, the player who went second rolls a dice. Game continues on the roll of 4+. This is a mission roll and cannot be re-rolled with a command point reroll.

Scoring: The difference in total VP's scored during the game decides the outcome of the battle. Count up points scored from Maelstrom and **Killpoints** and secondary objectives objectives (Slay The Warlord, First Blood and Linebreaker). The difference in total VP's scored decides the outcome of the battle.

EW: Altered Dominate and Destroy MOW: Targets of Opportunity Deployment: Frontline Assault

!!! Note that there is no cap on scoring maelstrom cards in this mission. More than 3 can be scored each turn !!!

Tactical Objectives:
Generate 3 Tactical Objectives at the start of the first turn. In each subsequent turn, **Opportunity Lost** takes effect. Discard all active objectives before drawing 3 new ones. If a player runs out of cards during the game, he reshuffles all the cards he hasn't scored yet this battle and proceeds to draw the necessary cards.

EW Scoring:
Each player scores 1 victory point at the end of each of their turns for each objective marker they control. Instead of using No Quarter Given as laid out in Chapter Approved, draw an additional maelstrom card each round for each KP scored in the previous turn.

Mission Special Rule: For this mission, **Second Chance** is in effect. At the start of your turn, before discarding all objectives, spend 2CP to keep one objective card active and draw 3 new cards.
